The Wealth Acceleration Equation

$$\text{Wealth} = (\text{Skill Value} \times \text{Market Demand} \times \text{Hours Worked} \times \text{Leverage}) - (\text{Costs} + \text{Taxes})$$

Where:

- Skill Value = Your hourly rate (\$100-500)
- Market Demand = Multiplier (1-10x)
- Hours Worked = Sustainable maximum (40-60)
- Leverage = People + Code + Capital (1-100x)
- Costs = Minimal through optimization
- Taxes = Minimized through structure
